GENETICS

A PERIODICAL RECORD OF INVESTIGATIONS BEARING ON HEREDITY AND VARIATION

Founded in 1916

by

GEORGE H. SHULL

with the cooperation of

WILLIAM E. CASTLE
EDWIN G. CONKLIN
CHARLES B. DAVENPORT
BRADLEY M. DAVIS
EDWARD M. EAST
ROLLINS A. EMERSON
HERBERT S. JENNINGS
THOMAS H. MORGAN
RAYMOND PEARL

VOLUME 32 - 1947

WITH FIFTEEN PLATES AND FIFTY-FOUR TEXT FIGURES

PUBLISHED BY THE
BROOKLYN BOTANIC GARDEN
BROOKLYN, NEW YORK
U. S. A.

INDEX

alcaptonuria, 82
Allium, desoxyribonucleic acid in cytoplasm, 107
apomixis, Parthenium hybrids, 262
Aloe, chromosomes in hybrid with Gasteria, 102
antigens, pigeons, 92, 178
artificial selection,
  and population genetics, poultry, 95
  for heterosis, poplar, 100
Aspergillus terreus, mutation rate, 90
AUERBACH, C., segregation, Drosophila, 3

bacteria,
  non-independent mutations, 95
  recombination and linked segregations, 505
  variation, 80
barley, linkage involving semisterility, 580
BISHOP, CHARLES J., sterility, broccoli, 79
BLANC, RICHARD, duplication of wings and antennae, *Drosophila melanogaster*, 79
BRAUCH, LIANE, T. O. SIPPEL, KATHERINE F. HAMILTON, and W. L. RUSSELL, strain specificity to transplants, mouse, 80
BRAUN, WERNER, bacterial variation, 80
breeding plans
  genetic improvement rate, poultry, 555
  methods of determination, 90, 567
  flocks resistant to lymphomatosis, 91
  artificial selection and population genetics, poultry, 95
BRINK, R. A., and D. C. COOPER, DE 17 allele, maize caryopsis, 350
broccoli, sterility, 79
Bromus species, synthesis of polyploids, 107
bud sports, histogenetics, 84
BURNHAM, C. R., and H. H. KRAMER, methods of combining linkage values, 379

CAMERON, JAMES W., carbohydrate control, maize endosperm, 81, 459
CARLSON, J. GORDON, and MARY ESTHER GUIDEN, colchicine, spindle formation and chromosome arrangement, grasshopper, 87
Carnation, chemistry, flower colors, 410
CARSON, HAMPTON L. and H. D. STALKER, gene arrangement frequencies and morphology, *Drosophila robusta*, 81
CASPARI, ERNST, gene action, Ephestia, 81
cattle, immunogenetics, 64
chemical treatment
  segregation, Drosophila, 3
  insulin and rumplessness, poultry, 94, 98
  mutations, mouse, 108
  leaf and root differentiation, Taraxacum, 111
chemico-genetics of reserve carbohydrates, maize, 459
chemistry, flower colors, carnation, 410
chiasma frequency and prophase duration, 83
CHIASSON, L. P., and JOHN W. MACARTHUR, cytogenetics, tomato species, 165
CHILD, GEORGE P., K. RAWLS, and W. K. HALL, alcaptonuria, 82
Chorthippus longicornis, chromosome abnormalities, 435

chromosome
  aberrations, X-rays and temperature, Tradescantia, 75
  abnormalities, Chorthippus, 435
  Aloe-Gasteria hybrid, 102
  arrangement and colchicine, 87
  B-type and nondisjunction, maize, 391
  breakage and induced mutations, 98
  cross over, asynaptic maize, 101
  electron microscopy, 500
  fragments, diploid wheat, 105
  hybrids, *Datura ceratocaula*, 84
  location of "deep orange" gene, *Drosophila melanogaster*, 96
  numbers, maize, 541
  second
    constitution, *Drosophila melanogaster*, 89
    inversion, *Drosophila melanogaster*, 92
    sex genes, *Drosophila melanogaster*, 100
  sensitivity to X-ray breakage, 106
  substitution, Secale for Triticum, 99
  third
    gene arrangements, *Drosophila pseudoobscura*, 142
    spermatogonial crossing over with Curly inversion, *Drosophila melanogaster*, 500
  XY_1Y_2 pairing, *Rumex hastatulus*, 104
  fourth
    variable phenotypes and heterochromatin, *Drosophila melanogaster*, 200
CLOUDMAN, A. M., G. D. SNELL, and ELIZABETH FAILOR
  genes and antigens, compatibility of tumor transplants, mouse, 105
  stimulation and inhibition of tumor transplants, mouse, 85
  strain susceptibility to transplantable tumors, mouse, 82
colchicine, spindle formation, and chromosome arrangement, 87
COLE, R. K., and F. B. HUTT, resistance to lymphomatosis, poultry, 91
COLEMAN, L. C., chromosome abnormalities, grasshopper Chorthippus, 435
Columbidae, antigens, 92, 178
CONGER, ALAN D., prophase duration and chiasma frequency, 83
COOPER, D. C., and R. A. BRINK, DE 17 allele, maize caryopsis, 350
cross-pollination, tomato, 101
crossing over, spermatogonial, third chromosomes, and curly inversions, *Drosophila melanogaster*, 608
Cucurbita pepo, reversal of dominance, 103
CUMLEY, R. W., and M. R. IRWIN, antigens, pigeons, 178
CUMMINGS, JEAN M., Datura hybrids, 84

dairy cattle, immunogenetics, 64
Datura hybrids, embryo dissection, 84
DAVIS, BRADLEY MOORE, balanced lethal situation following heat treatment, *Oenothera gaudens* · *franciscana*, 185

DEMPSTER, EVERETT R., and I. MICHAEL LERNER
structure of breeding flocks
rate of genetic improvement, poultry, 555
methods of determination, 567
DERMEN, HAIG, histogenetics of bud sports and variegations, 84
desoxyribose nucleic acid
and chromosome sensitivity to X-ray breakage during microsporogenesis, Trillium *et al.*, 106
in cytoplasm, Lilium *et al.*, 107
development
maize caryopsis, DE 17 allele, 350
and reversal of dominance, 103
Dianthus caryophyllus, chemistry of flower colors, 410
DICKIE, M. M., and GEORGE W. WOOLEY, fuzzy mice, 113
DIPPEL, RUTH V., T. M. SONNEBORN, and WINIFRED JACOBSON, kappa and paramecin, *Paramecium aurelia*, 106
DOBZHANSKY, TH., gene arrangement and natural selection, *Drosophila pseudoobscura*, 142
DOBZHANSKY, TH., and SEWALL WRIGHT, diffusion of mutant through population, *Drosophila pseudoobscura*, 303
dominance, reversal in development, 103
Drosophila affinis, anomalous sex ratio, 526
Drosophila melanogaster
bands of salivary X chromosome, 18
cytology of specific loci, 109
Dichaete bristle production, 97
duplication of wings and antennae, 79
eye color and fertility, 96
eye pigment in lozenge alleles, 89
heterochromatin and variegation, 109
inversions in wild populations, 92
low temperature and X-ray mutations, 93, 161
mutations of individual loci, 98
phenocopies and ultraviolet, 110
second chromosome constitution, 89
segregation after chemical treatment, 3
sex genes, second chromosome, 100
spermatogonial crossing over, 608
variable phenotype and heterochromatin, 200
Drosophila pseudoobscura
diffusion of mutant through population, 303
gene arrangement and natural selection, 142
Drosophila robusta
gene arrangement frequencies and morphology, 81
Drosophila virilis, species group, 108

EIGSTI, O. J., mitotic rate of diploids and tetraploids, pollen tube method, Polygonatum species, 85
endomitosis, grasshopper, 97
Ephestia, gene action, 81
Escherichia coli
non-independent mutations, 95
recombination and linked segregations, 505
resistance to radiation, 221
Euonymus japonica, variegation and cell division in histogenic layers, 85

FAILOR, ELIZABETH, A. M. CLOUDMAN, and G. D. SNELL
genes and antigens, compatibility of tumor transplants, mouse, 105
stimulation and inhibition of tumor transplants, mouse, 85
strain susceptibility to transplantable tumors, mouse, 82
fertility
in *Drosophila melanogaster*, 96
in tomato, 101
flower colors, chemistry, carnation, 410
FOGEL, SEYMOUR, alleles and gene action, maize, 86
fungi, mutation rate, 90

GADBOIS, DOROTHY S., and PAUL B. SAWIN, sex ratio, rabbit, 286
gametes, unreduced, asynaptic maize, 101
GARDNER, ELDON J., apomixis and sterility, Parthenium hybrids, 262
Gasteria chromosomes in hybrid with Aloe, 102
GAULDEN, MARY ESTHER, and J. GORDON CARLSON, colchicine, spindle formation, and chromosome arrangement, grasshopper, 87
GEISSMAN, T. A., and GUSTAV A. MEHLQUIST, chemistry of flower colors, carnation, 410
gene
action, and alleles, maize, 86
action, Ephestia, 81
action and regression, 90
arrangement frequencies and morphology, *Drosophila robusta*, 81
arrangements and natural selection, *Drosophila pseudoobscura*, 142
control, oxidase, mouse, 87
controlled audiogenic seizures, mouse, 87
diffusion through population, *Drosophila pseudoobscura*, 303
d1, tomato, 101
dosage relationships, wheat sphaerococcum, 102
fuzzy mouse, 113
induced "deep orange," *Drosophila melanogaster*, 96
interaction, *Lebistes reticulatus*, 88, 525
linkage, Habrobracon, 112
linkage map, sesame, 94
mutation rate, thalassemia, man, 99
recombination, *Escherichia coli*, 505
second chromosome, *Drosophila melanogaster*, 89
sex, second chromosome, *Drosophila melanogaster*, 100
source of evolution, 111
sphaerococcum, wheat, 102
Splotch, mouse, 102
genetic
control of carbohydrates, 81
data and punched cards, 96
environment and bristle production, *Drosophila melanogaster*, 97
improvement, poultry flocks, 555
influences on sex ratio, rabbit, 286
resistance to lymphomatosis, 91
GINSBURG, BENSON, and EDWART HUTH,

physiology of audiogenic seizures, mouse, 87
GINSBURG, BENSON, and FLORA KAPLAN, skin extracts and oxidase, mouse, 87
GOLDIS, BERNICE, and ANNA W. WHITING, X-rays and mutations, Habrobracon eggs, 112
GOODRICH, H. B., and RUTH L. HINE, gene interaction, *Lebistes reticulatus*, 88
GOODRICH, H. B., RUTH L. HINE, and HÉLÈNE M. LESHER, gene interaction, *Lebistes reticulatus*, 525
GORDON, MYRON, sex determination in wild populations, *Platypoecilus maculatus*, 8, 88
GOWEN, JOHN W., and MARIE S. GOWEN, second chromosome constitution, *Drosophila melanogaster*, 89
grasshopper
chromosome abnormalities, 435
endomitosis, 97
spindle formation and chromosome arrangement, colchicine, 87
GREEN, M. M., red eye pigment in lozenge alleles, *Drosophila melanogaster*, 89
guinea pig, silvering, 115

Habrobracon
eggs and X-ray induced mutations, 112
eye colors, 110
linkage groups, 112
HALL, W. K. GEORGE CHILD, and K. RAWLS, alcaptonuria, 82
HAMILTON, KATHERINE F., LIANE BRAUCH, and W. L. RUSSELL, strain specificity to transplants, mouse, 80
HAMMOND, MARIAN REESE, and A. H. SPARROW, desoxyribo nucleic acid in cytoplasm, Lilium *et al.*, 107
HAYS, F. A., breeding stock selection, poultry, 90
HAZEL, L. N., and I. MICHAEL LERNER, population genetics under selection, poultry, 95, 325
Hedera helix, variegation and cell division in histogenic layers, 85
heterosis, poplar hybrids, 100
HINE, RUTH L., and H. B. GOODRICH, gene interaction, *Lebistes reticulatus*, 88
HINE, RUTH L., H. B. GOODRICH, and HÉLÈNE M. LESHER, gene interaction, *Lebistes reticulatus*, 525
HINTON, TAYLOR, and PHILIP T. IVES, inversions in wild population, *Drosophila melanogaster*, 92
Hippodamia species, natural hybrids, 103
histogenetics, mutations and variegations in plants, 84
HOLLAENDER, ALEXANDER, and C. P. SWANSON, mutation rate and near infrared pretreatment, fungi, 90
HOLLANDER, W. F., genetics of pigeons, 90
HOVANITZ, WILLIAM, electron microscopy, chromosomes, 500
HULL, FRED H., regression and gene action, 90
human genetics
alcaptonuria, 82
brachydactyly, 96
Thalassemia, 38, 99
HUTH, EDWARD, and BENSON GINSBURG, physiology of audiogenic seizures, mouse, 87
HUTT, F. B., and R. K. COLE, resistance to lymphomatosis, poultry, 91

immunogenetics
cattle, 64
mouse, 105
paramecium, 93, 486
pigeons, 92, 178
indolebutyric acid, root and leaf differentiation, 111
insulin and rumplessness, poultry, 94, 98
IRWIN, M. R., antigens, pigeons, 92
IRWIN, M. R., and R. W. CUMLEY, antigens, pigeons, 178
IRWIN, M. R., R. D. OWEN, and CLYDE STORMONT, immunogenetics, dairy cattle, 64
IVES, PHILIP T., and TAYLOR HINTON, inversions in wild population, *Drosophila melanogaster*, 92

JACOBSON, WINIFRED, T. M. SONNEBORN, and RUTH V. DIPPEL, kappa and paramecin, *Paramecium aurelia*, 106
JOACHIM, GERTRUD STANTON, product method linkage involving semisterility, barley, 580

KAPLAN, FLORA, and BENSON GINSBURG, skin extracts and oxidase, mouse, 87
kappa and paramecin, *Paramecium aurelia*, 106
KIMBALL, R. F., resistance to antiserum, *Paramecium aurelia*, 93, 486
KING, EDWARD D., low temperature and X-ray mutations, *Drosophila melanogaster*, 93, 161
KODANI, M., variations of salivary X chromosome, *Drosophila melanogaster*, 18
KRAMER, H. H., and C. R. BURNHAM, combining linkage values, 379

lady beetles, Hippodamia natural hybrids, 103
LANDAUER, WALTER, insulin-induced phenocopies, poultry, 94
LANGHAM, D. G., linkage map, sesame, 94
LANGHAM, D. G., seedling characters, sesame, 94
Lebistes reticulatus, gene interaction, 88, 525
LEDERBERG, JOSHUA, recombination and linked segregations, *Escherichia coli*, 505
LERNER, I. MICHAEL, and EVERETT R. DEMPSTER
structure of breeding flocks
rate of genetic improvement, poultry, 555
methods of determination, 567
LERNER, I. MICHAEL, and L. N. HAZEL, population genetics under artificial selection, poultry, 95, 325
LESHER, HÉLÈNE M., H. B. GOODRICH, and RUTH L. HINE, gene interaction, *Lebistes reticulatus*, 525
lethals
dominant, X-ray induced, Habrobracon eggs, 112
following heat treatment, Oenothera, 185
in *Drosophila melanogaster*, 89
Ligustrum vulgare, variegation and cell division in histogenic layers, 85

Lilium, desoxyribose nucleic acid in cytoplasm, 107
linkage
involving semisterility, product method, barley, 580
linked segregations, *Escherichia coli*, 505
method of combining linkage values, 379
LURIA, S. E., non-independent mutations, bacteria, 95
LURIA, S. E., and EUGENE F. OAKBERG, sulfonamide resistance, *Staphylococcus aureus*, 249
Lycopersicum species, cytogenetics, 165

MACARTHUR, JOHN W., and L. P. CHIASSON, cytogenetics, tomato, 165
MCNUTT, C. W., brachydactyly, man, 96
MAHONEY, JOHN J., and EMIL WITSCHI, genetics of female prostate, rat, 112
maize
alleles and gene action, 86
amylaceous sugary endosperm, 448
asynaptic, cross over chromosomes, 101
caryopsis, DE 17 allele, 350
chemico-genetics, carbohydrates, 81, 459
chromosome numbers, 541
endosperm, carbohydrate control, 81, 459
inbreds, mutations, 104
nondisjunction, B-type chromosomes, 391
MANGELSDORF, PAUL
genetics of teosinte, 96
genetic data and punched cards, 96
inheritance of amylaceous sugary endosperm, maize, 448
MEHLQUIST, GUSTAV A., and T. A. GEISSMAN, chemistry of flower colors, carnation, 410
Melittobia, reproduction, 29
MERRELL, DAVID J., eye color and fertility, *Drosophila melanogaster*, 96
method
combining linkage values, 379
electron microscopy, chromosomes, 500
genetic data and punched cards, 96
genetic improvement, poultry, 91
pollen tube, for comparing mitosis rates, 85
product, linkage involving semisterility, 580
selecting breeding stock, poultry, 90
triploid, sex genes, *Drosophila melanogaster*, 592
MICKEY, GEORGE H., endomitosis in grasshopper, 97
microsporogenesis, and chromosome sensitivity to chromosome breakage, 106
mitosis
nondisjunction and B-type chromosome, 391
rate in diploids and tetraploids, 85
MITTLER, SIDNEY, Dichaete bristle production, *Drosophila melanogaster*, 97
MORGAN, L. V., variable phenotype, and heterochromatin, *Drosophila melanogaster*, 200
MORGAN, THOMAS HUNT, biography, 1
MOSELEY, HELEN RYDQUEST, insulin-induced rumplessness, embryology, poultry, 98
mouse
audiogenic seizures, 87
compatibility of transplants, 105
fuzzy mutation, 113
methylcholanthrene-induced mutations, 108
skin extracts and oxidase, 87
Splotch mutation, 102
stimulation and inhibition of tumor transplants, 85
strain specificity to transplants, 80
strain susceptibility to transplantable tumors, 82
MULLER, H. J., mutations of individual loci, *Drosophila melanogaster*, 98
mutations
fuzzy, mouse, 113
individual loci, *Drosophila melanogaster*, 98
induced by methylcholanthrene, mouse, 108
maize inbreds, 104
rate, fungi, 90
rate, man, 99
Splotch, mouse, 102
radiation resistance, *Escherichia coli*, 221
sulfonamide resistance, *Staphylococcus aureus*, 249
X-ray-induced, and low temperature *Drosophila melanogaster*, 93, 161
X-ray-induced, Habrobracon eggs, 112
natural selection, gene arrangement, *Drosophila pseudoobscura*, 142

NEEL, JAMES V., Thalassemia mutation rate, man, 99
NEEL, JAMES V., and W. N. VALENTINE, genetics of thalassemia, man, 38, 99
NOVITSKI, EDWARD, anomalous sex ratio, *Drosophila affinis*, 526

OAKBERG, EUGENE F., and S. E. LURIA, sulfonamide resistance, *Staphylococcus aureus*, 249
Oenothera gaudens · *franciscana*, balanced lethal situation, 185
O'MARA, JOSEPH G., substitution of Secale for Triticum chromosome, 99
OWEN, R. D., CLYDE STORMONT, and M. R. IRWIN, immunogenetics, dairy cattle, 64
oxidase, skin extracts, mouse, 87
Paeonia, desoxyribo nucleic acid in cytoplasm, 107
Pandanus veitchii, variegation and cell division in histogenic layers, 85
Paramecium aurelia
kappa and paramecin, 106
resistance to antiserum, 93, 486
paramecin and kappa, *Paramecium aurelia*, 106
Parthenium, apomixis and sterility in hybrids, 262
PAULEY, SCOTT S., selection for heterosis, poplar, 100
pigeons
antigens, 92, 178
genetics, 90
PIPKIN, SARAH BEDICHEK, sex genes in second chromosome, *Drosophila melanogaster*, 100, 592
Platypoecilus maculatus, sex determination, sex ratio, 8, 88
platyfish, sex determination, sex ratio, 8, 88
Polygonatum
commutatum, 85
pubescens, 85

poplar, heterosis in hybrids, 100
populations
  breeding flocks, poultry, 555, 567
  diffusion of gene, *Drosophila pseudoobscura*, 303
  gene arrangement and natural selection, *Drosophila pseudoobscura*, 142
  inversions, *Drosophila melanogaster*, 92
  Platypoecilus, 8, 88
  selection, poultry, 95, 325
Populus species, heterosis in hybrids, 100
poultry
  breeding for high fecundity, 90
  phenocopies, insulin-induced, 94
  population genetics under selection, 95, 325
  resistance to lymphomatosis, 91
  rumplessness, insulin-induced, 98
  structure of breeding flocks
    genetic improvement rate, 555
    methods of determination, 567
PUNYASINGH, KRUI, chromosome numbers, maize, 541

rabbit, sex ratio, 286
radiation treatment
  and resistance, *Escherichia coli*, 221
  near infrared pretreatment and X-ray mutation rate, Tradescantia, 90
  X-ray breakage and chromosome sensitivity during microsporogenesis, 106
  X-ray mutated chromosomes and temperature, Tradescantia, 75
  X-ray mutations, *Drosophila melanogaster*, 98
rat, genetics of female prostate, 112
RAWLS, K., GEORGE CHILD, and W. K. HALL, alcaptonuria, 82
RHOADES, M. M., cross over chromosomes, asynaptic maize, 101
RICK, CHARLES M., gene affecting fruitfulness, and cross pollination, tomato, 101
RILEY, HERBERT PARKES, chromosomes, Aloe-Gasteria hybrid, 102
Romalea microptera, endomitosis, 97
ROMAN, HERSCHEL, mitotic nondisjunction and B-type chromosome, maize, 391
Rumex hastatulus, sex chromosomes, 104
RUSSELL, W. L., Splotch mutation, mouse, 102
RUSSELL, W. L., LIANE BRAUCH, T. O. SIPPEL, and KATHERINE F. HAMILTON, strain specificity to transplants, mouse, 80

Sanseveria trifasciata, variegation and cell division in histogenic layers, 85
SAWIN, PAUL B., and DOROTHY S. GADBOIS, sex ratio, rabbit, 286
SAX, KARL, temperature and X-ray-induced chromosome aberrations, Tradescantia, 75
SCHMIEDER, R. G., and P. W. WHITING, reproduction in wasp Melittobia, 29
SEARS, E. R., sphaerococcum gene, wheat, 102
Secale cereale, chromosome substituted for Triticum chromosome, 99
sesame, *Sesamum indicum*
  linkage map, 94
  seedling characters, 94
sex
  chromosomes, *Rumex hastatulus*, 104
  genes, *Drosophila melanogaster*, 100, 592
  platypoecilus, 8, 88
sex ratio
  anomalous, *Drosophila affinis*, 526
  Platypoecilus, 8, 88
  rabbit, 286
SHIFRISS, OVED, developmental reversal of "dominance," *Cucurbita pepo l.*, 103
SHULL, A. FRANKLIN, natural hybrids, lady beetle Hippodamia, 103
SINGLETON, W. RALPH, mutations, maize inbreds, 104
SIPPEL, T. O., LIANE BRAUCH, KATHERINE F. HAMILTON, and W. L. RUSSELL, strain specificity to transplants, mouse, 80
SMITH, BEN W., and MARY THOMPSON SMITH, sex chromosomes, *Rumex hastatulus*, 104
SMITH, LUTHER, chromosome fragments, diploid wheat, 105, 341
SMITH, MARY THOMPSON, and BEN W. SMITH, sex chromosomes, *Rumex hastatulus*, 104
SNELL, G. D., A. M. CLOUDMAN, and ELIZABETH FAILOR
  genes and antigens, compatibility of tumor transplants, mouse, 105
  stimulation and inhibition of tumor transplants, mouse, 85
  strain susceptibility to transplantable tumors, mouse, 82
SONNEBORN, T. M., RUTH V. DIPPEL, and WINIFRED JACOBSON, kappa and paramecin, *Paramecium aurelia*, 106
SPARROW, A. H., chromosome sensitivity to X-ray breakage, Trillium, 106
SPARROW, A. H., and MARIAN REESE HAMMOND, desoxyribo nucleic acid in cytoplasm, Lilium *et al.*, 107
spindle formation and colchicine concentration, grasshopper, 87
STALKER, H. D., and HAMPTON L. CARSON, gene arrangement frequencies and morphology, *Drosophila robusta*, 81
Staphylococcus aureus, sulfonamide resistance, 249
STEBBINS, G. LEDYARD, JR., synthesis of polyploid Bromus, 107
sterility
  barley, 580
  broccoli, 79
  Parthenium hybrids, 262
  semi-, linkage calculation, 580
STONE, WILSON S., hybrids in *Drosophila virilis* group, 108
STORMONT, CLYDE, R. D. OWEN, and M. R. IRWIN, immunogenetics, dairy cattle, 64
Streptophilia spec., antigens, 92, 178
STRONG, L. C., mutations induced by methylcholanthrene, mouse, 108
STURTEVANT, A. H., THOMAS HUNT MORGAN (biography), 1
SWANSON, C. P., prophase chromosomes, Tradescantia, 109
SWANSON, C. P., and ALEXANDER HOLLAENDER, mutation rate and near infrared pretreatment, fungi, 90

Taraxacum, root and leaf differentiation following chemical treatment, 111

temperature
heat treatment, Oneothera, 185
and X-ray-induced chromosome aberrations, Tradescantia, 75
and X-ray mutations, *Drosophila melanogaster*, 93, 161
teosinte, genetics, 96
tomato
fruitfulness and cross-pollination, 101
species and hybrids, cytogenetics, 165
Tradescantia
chromosome aberrations and temperature, 75
duration of prophase and chiasma frequency, 83
prophase chromosomes, 109
transplants
compatibility, mouse, 105
strain specificity, mouse, 80
Trichophyton mentagrophytes, mutation rate, 90
Trillium
chromosome sensitivity to X-ray breakage, 106
desoxyribo nucleic acid in cytoplasm, 107
Triticum sphaerococcum, characters and dosage relationships, 102
Triticum monococcum, chromosome fragment, 105, 341
Triticum vulgare, chromosome replaced by Secale chromosome, 99
tumors, mouse
compatibility of transplants, 105
stimulation and inhibition of transplants, 86
transplantable, strain susceptibility, 82
tumor transplants, mouse
genes and antigens, compatibility of tumor transplants, 105
stimulation and inhibition of tumor transplants, 85
strain susceptibility, 82

VALENCIA, R. MARIE, heterochromatin and variegation, *Drosophila melanogaster*, 109
VALENCIA, J., cytology of specific loci, *Drosophila melanogaster*, 109
VALENTINE, W. N., and J. V. NEEL, genetics of thalassemia, man, 38, 99
variegation
heterochromatin effect, *Drosophila melanogaster*, 109
histogenetics, plants, 85
VILLEE, CLAUDE, A.
eye colors, Habrobracon, 110, 277
phenocopies, ultraviolet irradiation, *Drosophila melanogaster*, 110
WARMKE, H. E., and GERMAINE LECLERC WARMKE, indolebutyric acid, root and leaf differentiation, Taraxacum, 111

WEIR, J. A., source of genes for evolution, 111
wheat
monococcum, chromosome fragment, 105, 341
sphaerococcum gene, 102
vulgare, chromosome replaced by Secale, 99
WHITING, ANNA R., and BERNICE GOLDIS, X-rays and mutations, Habrobracon eggs, 112
WHITING, P. W., linkage in Habrobracon, 112,
WHITING, P. W., and R. G. SCHMIEDER, reproduction in wasp Melittobia, 29
WHITTINGHILL, MAURICE, spermatogonial crossing over in presence of inversions, *Drosophila melanogaster*, 608
WITKIN, EVELYN M., resistance to radiation, *Escherichia coli*, 221
WITSCHI, EMIL, and JOH. J. MAHONEY, genetics of female prostate, rat, 112
WOOLEY, GEORGE W., and M. M. DICKIE. fuzzy mice, 113
WRIGHT SEWALL, silvering, guinea pig, 115
WRIGHT, SEWALL, and TH. DOBZHANSKY, diffusion of mutant through population, *Drosophila pseudoobscura*, 303
